Update (12/20/2015)

What im starting with, cleaning up and basic manual functioning...

Update (12/27/2015)

Have the reed swtichs working and gizmo is hooked to an arduino functioning by me manually hitting buttons.

Update (01/09/2016)

Getting close, have a "real" panel working, fully functional.

Update (02/28/2016)

Final

Completly working and cutting wood.

Arduino Code

Here's a [link](#) to the code, there is also a download on the page.
