Wanted a stand for my Nook HD+ which would let me stand the Nook up vertical while plugged in (charger or USB).

Made from aluminum and brass.

All the "knobs" are 3/8-16 and knurled. The front two knobs which hold the Nook in place screw into two threaded sleeves 1/2-20 x 3/8-16 and made from 1018; figured they would get the most use and did not want to beat up on or wear out the aluminum (which was around 3/16 thick).

So far so good, no complaints yet.
