Create a new file, **save_UsersAndGroups.sh**

Make your newly created file executable

Terminal

```
name@machine:/$ sudo chmod +x /path/to/save_UsersAndGroups.sh
```

Copy the code posted here to **save_UsersAndGroups.sh** then save.

```
#!/bin/bash

# 0 will list off /home/UserName's
# 1 will list off all user accounts (www-data, mysql, daemon, syslog, etc.)
allUsers=1;

if ; then
    cat /dev/null > 'UsersAndGroups.log';
fi

if ; then
    gawk -F: '{ print $1 }' /etc/passwd > 'UsersAndGroups.log';
else
    ls /home > 'UsersAndGroups.log';
fi

num=0
for user in `cat UsersAndGroups.log`; do
    users[$num]=$user;
    num=$(( $num + 1 ))
done
cat /dev/null > 'UsersAndGroups.log';

users_count=${#users[@]};
for (( i=0;i<'UsersAndGroups.log';
    #groups ${users[${i}]});
done
```
