frontpage

A personal web site of different projects which i've been involved in or made.

As time goes by i'll try and update the site with past project's which i have documented along with any current projects. Ive tried to cite any source of inspiration or help that i may have had on a project, but if you know i missed something, send me an email from the '[contact](#)' page and i will fix it. If you notice a 1999 date on an image, sorry about this, its wrong and i have no idea when it was taken..

If you like RSS Feeds here is the main one for the site 

. You can also subscribe to individual categories

through the [site map page](#).
